Investment Objective

The investment objective of the Fund is to invest substantially all of its assets in Aditum Investment Funds - HCM Multi-Asset Adventurous Fund (the “Master Fund”), a sub-fund of Aditum Investment Funds, a Luxembourg mutual fund (fonds commun de placement) qualifying as undertaking for collective investment in transferable securities (UCITS). The Master Fund is an actively managed fund-of-funds that seeks to deliver total return through capital appreciation, income accumulation over a mid to long-term investment horizon and through investing in a diversified range of assets in proportion with its long-term risk profile which is characterised as MEDIUM-HIGH.

Risk and Reward Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk Considerations

The risk and reward indicator illustrates where the Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Fund is in the lowest risk class you can lose money, as no investments are entirely risk free. The Fund will entail substantially the same risks as an investment in the underlying Master Fund. At this time, the level of the risk and reward profile is equal to 4, in line with the risk and reward profile for the Master Fund. For full details of the risks the Fund may be exposed to, please refer to the Fund's Prospectus.
