INVESTMENT OBJECTIVE

PIMCO GIS Income Fund Open Ended IC Plc (the "Fund") invests substantially all of its assets in the Income Fund (the "Master Fund"), a sub-fund of PIMCO Funds: Global Investors Series plc. The Master Fund seeks high current income. The Master Fund utilises a global multi-sector strategy that seeks to combine the Master Fund Manager's total return investment process and philosophy with income maximization. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities. Top-down and bottom-up strategies are used to identify multiple sources of value to generate consistent returns. Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities. The Master Fund is diversified broadly across regions, industries, issuers, and asset classes, as well as through a varied set of sources of value and employs independent research and prudent diversification with respect to industries and issuers in order to seek to achieve its investment objective.

RISK AND REWARD INDICATOR

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

RISK CONSIDERATIONS

The risk and reward indicator illustrates where the Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk Fund may be exposed to, please refer to the Fund's Prospectus. classification may change over time. Even if the Fund is in the lowest risk class you can lose money, as no investments are entirely risk free. The Fund will entail substantially the same risks as an investment in the underlying Master Fund. At this time, the level of the risk and reward profile is equal to 4, in line with the risk and reward profile for the Master Fund.
