## INVESTMENT OBJECTIVES

Aditum Islamic Income and Growth Fund Open Ended IC Plc is an actively managed Shari'a compliant fund that aims to deliver a total return through investing in funds or securities to achieve long-term capital growth. The Fund will indirectly take a balanced approach to equity markets, with such exposure to Shari'a compliant equity or equity-linked securities typically ranging between 40% and 75% exposure, of its assets with a neutral position of 60%. The remainder of the Fund assets will be invested in funds or securities which invest in other asset classes such as Sukuk, alternatives and cash. There is no guarantee that the Fund will meet its investment objective or deliver a positive return and capital is at risk. The Fund will typically access markets through direct single security exposure but it may gain exposure to certain markets and assets through collective investment schemes.

## RISK INDICATOR

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

## RISK CONSIDERATIONS

The risk and reward indicator illustrates where the Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore, the risk classification may change over time. Even if the Fund is in the lowest risk class you can lose money, as no investments are entirely risk free. The Fund invests mainly in funds or securities globally across a variety of asset classes, including equities, equity-linked and equity-related securities (deemed Shari'a compliant) and Sukuks. Equity securities fluctuates in value based on changes in a fund/company's financial condition, general market and economic environments and market conditions, resulting in an increased potential for volatility. The Sukuk market due to its size may create low levels of liquidity. The Fund's investment positions may furthermore be leveraged by entering into Shari'a compliant arrangements from securities broker-dealers, banks or others or investments in underlying funds or securities that themselves may leverage their own assets. The Fund will therefore be subject to credit and liquidity risks. At this time, the level of the risk and reward profile is equal to 4 as the performance can be subject to relatively moderate fluctuations.
