INVESTMENT OBJECTIVES

The Global Fixed Income Plus Fund* ("GFIPF") is an actively managed fixed income fund that aims to generate a regular stream of fixed income returns and cash distributions through investments in fixed income securities (and any other asset class that may be appropriate from time to time) to seek to achieve an attractive risk-adjusted return. This is a performance target and is not guaranteed.

*Marketing name for the Fund's full legal name: Global Fixed Income Plus Fund 2028

PERFORMANCE – TOTAL RETURN (%)

| | 1M | 3M | 6M | 1YR | S.I.* | Dividends S.I.** |
|-------|--------|------|------|--------|--------|------------------|
| GFIPF | (0.90) | 0.94 | 5.31 | (4.39) | (2.69) | 9.38 |

*Since inception 4 November 2024 for C (Inc) USD share class.

The performance figures presented, including total return, are based on historical data and do not guarantee future results. Total return includes capital appreciation and any dividend** made by the Fund and may be shown on a gross or net basis, subject to the methodology disclosed. Performance as stated here is capital movements plus income, which has been paid out, and added back to derive a total return. Past performance is not an indicator or guarantee of future performance and market conditions may impact future returns. The value of shares in the fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Investors should consider all relevant risk factors, including market volatility, economic conditions, and Fund-specific risks, before making investment decisions. Performance may also be affected by currency fluctuations of the underlying holdings. It is the Directors' intention to leverage the capital of the Fund at levels expected to represent around a 67% maximum loan-to-value ("LTV") ratio (approximately 2x base equity of the Fund), subject to the availability of financing and the discretion of the Directors (on the advice of the Investment Manager) to amend the LTV target as they deem appropriate. The Fund intends to source leverage by borrowing in different currencies, which will expose the fund to currency risk.

Investing in this fund involves a significant degree of risk due to the use of leverage. Leverage, or borrowing to invest, can amplify both gains and losses, which makes leveraged investments suitable only for investors who fully understand and are prepared to accept the potential volatility and loss. Key Risks to Consider will include market risk, increased volatility, loss of principal, interest rate risk and financial costs (leverage involves borrowing costs that may increase due to rising interest rates. These costs can erode returns and increase the risk of losses, particularly in prolonged periods of higher interest rates), liquidity risk, margin calls and forced liquidation, regulatory and tax implications. Investors should seek independent tax advice to understand regulatory and tax implications fully. Leveraged investments are generally suitable for experienced investors who are financially capable of managing the risks associated with significant losses and who have a high-risk tolerance. This fund is not recommended for conservative investors or those with a short-term investment horizon.
