INVESTMENT OBJECTIVES

Signature CIO Islamic – Growth Fund Open Ended IC Plc (the “Fund”) is an actively managed Shari'a compliant fund that aims to achieve growth mainly through capital appreciation over a mid to long-term investment horizon by investing in a diversified portfolio of Shari'a compliant opportunities across multiple asset classes. The Fund will typically access markets through direct security exposure, but it may gain exposure to certain markets and assets through Shari'a compliant collective investment schemes for efficient portfolio management purposes. The Fund will only invest in securities that comply with the principles of Shari'a.

FUND COMMENTARY

For the CIO Islamic Growth Fund, performance during the month reflected the continued strength of risk assets, with the fund delivering a total return of +2.32%. As of month-end, the fund maintained an asset allocation of 79.5% in Islamic equities, 14.8% in fixed income, and 5.7% in gold, positioning the portfolio to capture growth opportunities while preserving diversification. The equity portfolio remained focused on large-cap, high-quality companies, with a weighted average market capitalization of USD 1.42 trillion, a dividend yield of 1.11%, and a weighted average P/E of 23.9x, reflecting continued exposure to premium growth franchises. On the fixed income side, the sukuk allocation maintained a weighted average yield to maturity of 5.78%, a modified duration of 7.2, and an average credit rating of BBB-, underscoring a disciplined, investment-grade approach to income generation and portfolio construction.

During the period under review, equities were the primary driver of performance, contributing approximately +1.99% over the month. On a sector level, Communications (+65 bps) and Industrials (+58 bps) led gains, followed by Consumer Non-Cyclicals (+50 bps), Energy (+24 bps), and Basic Materials (+19 bps). These gains were partially offset by modest weakness in Consumer Cyclical (-6 bps) and Technology (-4 bps). At the stock level, the top contributors were Alphabet (+35 bps) and Samsung Electronics (+30 bps), followed by Micron and Taiwan Semiconductor (both +19 bps) and Lam Research (+18 bps), reflecting continued strength in semiconductor and AI-linked names. Additional support came from Amazon, ASML, Nvidia, and Plexus, while weakness in select mega-cap technology holdings weighed on returns, with Microsoft the largest detractor (-50 bps), followed by Apple (-19 bps), Adobe (-16 bps), and Autodesk (-9 bps). From a geographical perspective, the United States (+59 bps) was the largest contributor, complemented by gains in Korea (+30 bps) and Taiwan (+23 bps), highlighting the benefits of the portfolio's global diversification.

Gold contributed approximately +45 bps during the month, providing a meaningful uplift to overall returns. The allocation continued to serve its intended role as a portfolio diversifier, helping enhance risk-adjusted returns while complementing the fund's growth-oriented equity exposure.

Fixed income was slightly negative (-0 bp) during the month, as long-dated sukuk underperformed amid curve steepening. Positions in the 3–5 year segment added +15 bps, while very short tenors (<1 year) contributed around +7 bps, and 1–3 year holdings were broadly flat. In contrast, 10–15 year maturities detracted -32 bps and 15+ year sukuk a further -2 bps. Geographically, gains from Kuwaiti banks (+4 bps), the UAE (+2 bps), and Turkey (+2 bps) were more than offset by long-dated Indonesian sovereign sukuk (-20 bps), with smaller drags from Malaysia (-5 bps), Qatar (-2 bps), and Oman (-1 bp). From a sector perspective, banks (+5 bps) and diversified financials (+6 bps) were the main contributors, while sovereign exposures (-30 bps) weighed on performance.

Overall, the fund delivered a strong monthly performance, driven primarily by robust equity markets and supported by gold's defensive characteristics. These gains helped offset modest headwinds from long-duration sukuk, underscoring the benefits of the fund's diversified asset allocation and balanced approach to growth and risk management.

Mir Muntasir, Lead Manager – Fixed Income & Equities

RISK AND REWARD PROFILE

The risk and reward indicator illustrates where the Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore, the risk classification may change over time. Even if the Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

RISK CONSIDERATIONS

The Fund invests mainly in Shari'a compliant securities and funds globally across a variety of asset classes that may include equities, Sukuk, liquid alternatives (through Shari'a compliant exchange traded funds) and cash. Equity securities fluctuate in value based on changes in a company's/fund's financial condition, general market and economic environments and market conditions, resulting in an increased potential for volatility. The Sukuk market due to its size may create low levels of liquidity. The Fund's investment positions may furthermore be leveraged by entering into Shari'a compliant financing arrangements. The Fund will therefore be subject to credit and liquidity risks. At this time, the level of the risk and reward profile is equal to 4 as the performance can be subject to relatively moderate fluctuations. For full details of the risks the Fund may be exposed to, please refer to the Fund's Prospectus.
